

Austen Conrado: Solar-R-Us Elevator Pitch

For	Home or apartment owners and commercial businesses
Who	Needs an energy efficient heating system that is environmentally friendly, reduces costs, and are easy to install and maintain.
Our Product	SRU is creating a new solar-powered water heating system that offers several advanced solar collecting and water tank storage features and functionalities.
That	Incorporates new solar panel technology to accommodate easier customer management, a more environmentally conscious society, a longer life period, and maintain high water temperatures for a longer period.
Unlike	Other expensive installation costs and more complex solar-water heating solutions that cannot maintain high water temperatures for a long period of time.
(Our Product)	The new SRU product has advanced features offering a more user-friendly, innovative, and aesthetically pleasing system.
